Managing Safely

ABOUT

DOMESTIC, COMMERCIAL AND INDUSTRIAL WINDOW CLEANING

Here at Direct Shine we are specialists in our field of window cleaning and external cleaning services, enabling us to clean your windows safely while delivering the client, a truly professional and quality service.

Our top of the range equipment allows us to reach heights of 65 feet, without the use of ladders or other access equipment, therefore allowing the window cleaning operative to keep their feet on the ground, complying with all aspects of Health & Safety.

OUR SERVICES

WINDOW CLEANING

Direct Shine have years of window cleaning experience, cleaning literally thousands of windows each month. We look after the window cleaning of hotel chains, care home groups, high street shops, fast food outlets, office blocks and residential properties.

Our window cleaners are fully insured, licensed and trained, meaning you are getting a professional cleaning service on every occasion.

Serving both domestic and commercial customers, we believe quality of service counts – that's why we are committed to providing an excellent service for all our clients. Our prices are always competitive and we provide free quotations on request.

We offer our residential and commercial window cleaning service on a regular basis so that your windows will always remain clean and give off a lasting impression.

Our specialist water fed poles can reach heights up to 60ft, the water fed pole systems ensure a spotless, streak free finish, including UPVC frames, doors and sills at no extra cost. The water is purified through our specialist filtration systems fitted to our vans. This system keeps ladder use to a minimum, yet still allowing a great finish.

Although our primary method of window cleaning is from the reach and wash system, Direct Shine are fully aware that this not suitable for all situations and are fully trained to use the traditional method of applicator and squeegee and can quote for this type of work.

CONSERVATORY ROOF CLEANING

Your home's conservatory is one of its most maintenance-free parts, but its roof can occasionally get cluttered and they are prone to algae build-up which blocks the light and heat. It can be very annoying to have a dirty conservatory and not be able to reach to clean it. That is why we can help.

We are very careful when cleaning polycarbonate and glass conservatory roofs. Polycarbonate roofs if cleaned with household cleaners can damage coatings and seals that the manufacturer has applied to shield them from UV rays. We therefore use a pure Water system which is harmless to polycarbonate roofs.

SOLAR PANEL CLEANING

Having solar panels installed is a considerable investment! If you are not getting the output you paid to achieve then it makes sense to help keep them at their peak performance. Urban pollution, bird droppings, tree sap, leaves, pollen, and soot all build into a layer of grime. Even rain water leaves a deposit, and regular cleaning products can leave a sticky chemical residue.

CHEWING GUM REMOVAL

Chewing gum is a serious problem for councils, transport companies and commercial property owners who are responsible for the cleaning and upkeep of these areas and vehicles. These areas can often appear unhygienic and can be extremely off-putting to potential clients or members of the public.

Direct Shine has invested in equipment that makes this task far easier and cost-effective than previous methods. Our company offers this removal and cleaning service in most major cities across Scotland. We service Edinburgh, Glasgow, Dundee, Aberdeen, Stirling, Perth and Inverness. We are also available for other locations out with the main cities.

GRAFFITI REMOVAL

Graffiti damage which is sprayed and painted onto walls can be made up of paints, spray paints, chalks, felt tip markers and even ball point pens, which can be problem to remove with normal cleaning solutions. Direct Shine can remove graffiti damage from any surface using a specialist removal technique.

GUTTER CLEANING

It is vital to clear out gutters regularly as the knock on effects can prove quite costly. As they are usually situated in awkward locations, many people choose to ignore them which leads on to further problems outside and inside their properties.

FASCIA AND SOFFIT CLEANING

Over time your fascia and soffit boards can look tired, dull and dirty. This not only looks unsightly, but can also cause permanent damage if not kept clean.

Your fascias and soffits are an integral part of your home and as such should be well maintained. Even with UPVC fascias - which are relatively maintenance-free - they still need to be maintained to be kept looking at their best. White UPVC fascias would benefit from an annual clean, as it would stop the dirt from etching into the plastics and keep them looking like new, as clean soffits and fascias always enhance the appearance of the property.

PRESSURE WASHING

Direct Shine specialise in Pressure Washing and Blast Cleaning many types of surfaces at great prices.

Whether you need a dirty drive cleaning, a professional block paving cleaning service, garage forecourt or if you're just looking for a patio or deck cleaner, Direct Shine can provide the help you need.

UPVC CLEANING

UPVC is portrayed as being a maintenance free product but over time your UPVC windows and doors can become discoloured. This is caused by a build-up of moss, algae, dust, grime, slime cobwebs and dirt, combined this will make your UPVC look dull and very unattractive not only that if left unattended it can lead to rot and damp.

OUR PARTNERS

Direct Shine provide a cost-effective and quality service to many different sectors throughout Scotland. Ranging from one site locations to multi-site national contracts. Direct Shine have an enviable client retention rate and dedicated teams who look after our commercial clients throughout Scotland.

Direct Shine carry ten million pounds public liability and all our staff are fully trained and licensed to carry out the task in hand. Copies of our methods statement and risk assessment may be provided at any time.
